

COMMUNICATION TO SUPPLIERS

CNH INDUSTRIAL BRASIL LTDA. informs that, due to the GECEX resolution nº. 272, from 11/19/2021, to communicate and give the necessary awareness to its Suppliers about the need to updates and / or modifications, as per TEC 2022 (Tarifa Externa Comum 2022):

- Inclusion of New NCM's (Nomenclatura Comum Mercosul) in the Material Master Data;
- Suppress NCM's that will no longer exist;
- NCM's split down.

In this way, from **04/01/2022** the invoices issued by CNH INDUSTRIAL BRASIL LTDA will already have the NCM's updated. However, due to the large volume of adjustments in the system, delays may occur during our Inbound Procedure and consequently in the Release of Trucks, in the period between 04/01/2022 to 04/04/2022.

As a rule, the changes promoted by this Resolution do not impact IPI taxation. Except for Glass, which, to comply with TEC 2022 in the new NCM 8708.22.00, "glasses must include frames and/or heating devices or other electrical or electronic devices".

Otherwise, they remain in position 7007.

Windshields, framed windows, with trims and/or heating devices or other electrical devices that are currently sold/invoiced with NCM 8708.29.9, must be changed to new NCM 8708.22.00.

Please execute the necessary changes in your system and affected procedures as well.

In case of questions and / or doubts, please see below the contacts for each manufacturing location:
